CALCULATION METHODS:

Certain charges may be shown on the previous pages, some of which may be tied to balance requirements. These balance requirements are based on either the daily balance method or the average daily balance method as indicated. If the daily balance method is indicated, the charges shown are assessed if the balance in the account falls below the required balance any day during the indicated period. If the average daily balance method is indicated, the charges shown are assessed if the average daily balance during the indicated period falls below the required average balance. The average daily balance is calculated by adding the balance in the account each day of the period and dividing that figure by the number of days in the period.
